

Measure, Assess and Improve

Use this worksheet to record your thoughts on how successful your Design Solution is. You will need to go back and remind yourself of the Context and Needs you wrote at the start of the process, and ask yourself...

“Is our Design Solution responding to all the needs we identified?”

Finish by thinking about what you might like to change to improve your Design Solution.

Context	Needs Related to Context	Review Comments
Example... Increasingly hot summers will make water harder to find.	Design needs to use minimal water or have a method for collecting water.	

What can we change or improve?
