

Understanding Your Challenge – Context & Needs

Use this worksheet to record the Context which might be important for your Challenge, and how this might influence the Needs your Design Solution will need to consider.

- Who are you solving this Challenge for?
- What will they gain from the solution? Are there any losers?
- How might local conditions such as climate, weather, terrain and access affect my Design Solution?
- How might the needs of local people affect how I approach this?
- How might the solution affect local people, environment, and the economy?

Context	Needs Related to Context
<i>Example... Increasingly hot summers will make water harder to find.</i>	<i>Design needs to use minimal water or have a method for collecting water.</i>
